Module 6
Correlation Between Variables
Type of Correlation
Variable Types
Possible Techniques
Bivariate
Continuous and continuous
Pearson (Simple, Zero-Order) Correlation
Ordinal and ordinal
Spearman Rank-Order Correlation
Kendall's Tau
Polychoric Correlation
Dichotomous and dichotomous
Phi Coefficient
Tetrachoric Correlation
Continuous and ordinal
Polyserial Correlation
Continuous and dichotomous
Point-Biserial Correlation
Biserial Correlation
Continuous and categorical
Eta Correlation
Multiple
1 continuous dependent and
2+ continuous independent variables
Multiple Correlation
2+ continuous dependent and
2+ continuous independent variables
Canonical Correlation
Partial
Partial Correlation
Semipartial Correlation
