Module 9
Scaling and Rescaling

Purpose	Number of Variables	Model Fit	Possible Techniques
Scaling			Thurstone Type
			Guttman Type
			Likert Type
Rescaling	1	Linear	Z-Score Standardization
			Min-Max Scaling
		Robust linear	Robust Z-Score Standardization
			Robust Min-Max Scaling
			Winsorized Scaling
			Huber M-Estimation
			Trimmed Mean Scaling
			Robust Quantile Transformation
		Nonlinear	Log Transformation
			Box-Cox Transformation
			Robust Log Transformation
			Rank-Based Transformation
			Quantile Transformation
			Logistic Regression Transformation
			Polynomial Transformation
	2	Linear	Principal Component Analysis
			Exploratory Factor Analysis
			Metric Multidimensional Scaling
			Canonical Correlation Analysis
			Correspondence Analysis
			Multiple Correspondence Analysis
		Robust linear	Robust Principal Component Analysis
			Robust Exploratory Factor Analysis
		Nonlinear	Nonparametric Multidimensional Scaling
			Item Response Theory Models
			Multivariate Polynomial Scaling
